# WHY WE DESIGN

**Most brands don't fail because of lack of effort, they fail because they look and sound like everyone else.**

In a world flooded with trends, templates, and quick fixes, originality is often the first thing sacrificed. Brands chase what's popular instead of building what's meaningful.

**Pink Gorilla Studio** exists to challenge the ordinary. We work with founders and teams who believe design is more than decoration, it's a strategic tool that shapes perception, builds trust, and defines how a brand is experienced.

Our approach focuses on clarity, confidence, and intention. Every visual decision is made with purpose, **ensuring the final outcome doesn't just look good**, but **works in the real world**, across platforms, audiences, and time.

# HOW WE THINK

## Our Point of View

**01 Design is not decoration**  
 Good design solves problems. Great design makes brands memorable.

**02 Strategy before aesthetics**  
 Visuals mean nothing without purpose, context, and direction.

**03 No shortcuts, no templates**  
 Every project is built from scratch — because no two brands should look the same.

In a world flooded with trends, templates, and quick fixes, originality is often the first thing sacrificed. Brands chase what's popular instead of building what's meaningful. **Pink Gorilla Studio** exists to challenge the ordinary. We work with founders and teams who believe design is more than decoration, it's a strategic tool that shapes perception, builds trust, and defines how a brand is experienced.

# WHAT WE BUILD

**We build brands and digital experiences that are designed to work, not just impress.**

Our work goes far beyond surface-level aesthetics. At **Pink Gorilla Studio**, we focus on creating brand systems and visual identities that feel **confident, consistent, and intentional** across every touchpoint. From logos and core identity systems to websites and supporting visual assets, everything we build is designed to communicate clearly and function effectively in the real world.

Each project begins with understanding. We take the time to study the business, its audience, and its long-term goals before translating insight into visual form. This approach allows us to create design solutions that are not only distinctive, but also relevant, scalable, and grounded in purpose.

The result is work that **helps brands show up with clarity and confidence**, building recognition, credibility, and trust over time. We don't chase trends or rely on templates. We build visual foundations that support growth, adapt to change, and remain strong long after launch.

*Branding • Visual Identity • Logo Design • Web Design*

# FEATURED PROJECT

**Pink Gorilla Studio** has collaborated with clients from various countries, industries, and stages of growth. This international experience has refined our ability to translate ideas into visual systems that resonate beyond local trends.

Working across different markets has taught us that value in design is not measured by cost alone, but by how effectively it elevates perception, builds trust, and supports business goals over time.

# OUR CLIENTS

**Every collaboration brings a different perspective, shaped by market, culture, and ambition.**

Over the years, **Pink Gorilla Studio** has had the opportunity to collaborate with clients across different countries, industries, and stages of growth, from early-stage brands finding their voice to established businesses refining their presence. Working with a diverse range of clients has strengthened our ability to adapt to different markets, audiences, and expectations.

This international experience allows us to approach every project with a broader perspective, ensuring the work not only looks visually strong, but also communicates clearly and effectively across regions. No matter the scale or location, our focus remains the same: **delivering design that is intentional, consistent, and built to last.**

# TESTIMONIALS

**Pink Gorilla Studio** offers design services through established global platforms such as **Freelancer.com** and **99designs**. A few testimonials featured on this page are taken directly from these platforms and reflect genuine feedback from clients we have worked with. We believe credibility is built through real experiences, not curated narratives. That's why all testimonials shown here are authentic, unedited, and publicly verifiable. They represent honest responses to the quality of work, communication, and collaboration delivered throughout each project. For those who value transparency, these reviews can be independently checked on the respective platforms. We welcome potential clients to explore them firsthand, because trust is strongest when it can be verified.

Always 5 star service! Have worked with them several times for logo design - highly recommend!
